When is the wedding? Come on, grow some balls and treat Microsoft like the unapologetic contemptuous bunch of greedy law breakers they are. Jesus Christ, is every part of the US Government happily sucking at Micro\$oft's teat or what? How in God's name could Microsoft be allowed to pick their own damn "punishment"? I'd laugh if the reality of the whole thing weren't killing the software company I work for, thanks for looking out for the filthy fucking rich at the expense of all others.
